A. Albuero, Florian / B. Rana, Pradumna: Economic Stabilization Policies in ASEAN Countries

Pradumna Blatt Rana, Florian A. Albuero. 1987. 1 online resource. ISBN 9789814345842

⇒ <https://doi.org/10.1355/9789814345842>

⇒ <https://www.degruyter.com/cover/covers/9789814345842.jpg>

⇒ Dieser Titel ist/war im Internet online verfügbar.

⇒ Inhaltliche Zusammenfassung:

The five-country study found in this volume examines how the ASEAN countries performed aggregatively during the 1970s in response to several shocks. The sources of the shocks are traced and the subsequent policies are then described in detail to understand their appropriateness as stabilization tools. Some of their country papers apply econometrics to understand underlying structures.

A., Aneesh / Akhavan, Niki / Andrew, Ross: After Capitalism

Horizons of Finance, Culture, and Citizenship / Kennan Ferguson, Patrice Petro. (New Directions in International Studies) 2016. 1 online resource (270 Pages). ISBN 9780813584294

⇒ <https://doi.org/10.36019/9780813584294>

⇒ <https://www.degruyter.com/cover/covers/9780813584294.jpg>

⇒ <https://www.degruyter.com/isbn/9780813584294>

⇒ Dieser Titel ist/war im Internet online verfügbar.

⇒ Inhaltliche Zusammenfassung:

From Thomas Piketty to David Harvey, scholars are increasingly questioning whether we are entering into a post-capitalist era. If so, does this new epoch signal the failure of capitalism and emergence of alternative systems? Or does it mark the ultimate triumph of capitalism as it evolves into an unstoppable entity that takes new forms as it engulfs its opposition? After Capitalism brings together leading scholars from across the academy to offer competing perspectives on capitalism's past incarnations, present conditions, and possible futures. Some contributors reassess classic theorizations of capitalism in light of recent trends, including real estate bubbles, debt relief protests, and the rise of a global creditocracy. Others examine Marx's writings, unemployment, hoarding, "capitalist realism," and coyote (trickster) capitalism, among many other topics. Media and design trends locate the key ideologies of the current economic moment, with authors considering everything from the austerity aesthetics of reality TV to the seductive smoothness of liquid crystal. Even as it draws momentous conclusions about global economic phenomena, After Capitalism also pays close attention to locales as varied as Cuba, India, and Latvia, examining the very different ways that

economic conditions have affected the relationship between the state and its citizens. Collectively, these essays raise provocative questions about how we should imagine capitalism in the twenty-first century. Will capitalism, like all economic systems, come to an end, or does there exist in history or elsewhere a hidden world that is already post-capitalist, offering alternative possibilities for thought and action?.

⇒ Dieser Titel ist/war im Internet online verfügbar.

⇒ Inhaltliche Zusammenfassung:

Countless lives have been saved as a result of recent strides in earthquake engineering and related sciences. This trend has been furthered by the work of the Canadian national Committee on Earthquake Engineering which has, over the past twenty years, provided specialists with a forum for exploring new approaches to the problem. Engineers, scientists, researchers, geologists, seismologists, and other professionals have shared research and experience at the committee's conferences. The sixth of these, held in June 1991, is documented in this volume. Three keynote papers provide the overall focuses for the volume. Each deals with one of the three major areas in the field: structures, in a paper on design developments in high-rise design and construction in Japan; geotechnical engineering, in a discussion of the effects of site conditions on ground motions; and seismology, in an account of the development of phased strong-motion time-histories for structures with multiple supports. Shorter papers fall into three broad areas: response analysis and design of structural components; the interaction of seismicity, mitigation, soil response, and social structure; and seismic codes and structures. This conference, along with other similar events throughout the world, has contributed significantly towards understanding various phenomena needed for building safe, reliable, and economical structures that can meet the challenges presented by the forces of nature.

⇒ Inhaltliche Zusammenfassung:

Leading East Asian Buddhist thinkers of the seventh century compared, analyzed, and finalized seminal epistemological and soteriological issues that had been under discussion in India and East Asia for centuries. Among the many doctrinal issues that came to the fore was the relationship between the Tathagatagarbha (or "Buddha-nature") understanding of the human psyche and the view of basic karmic indeterminacy articulated by the new stream of Indian Yogacara introduced through the translations and writings of Xuanzang and his disciples. The great Silla scholiast Wonhyo (617-686), although geographically located on the periphery in the Korean peninsula, was very much at the center of the intense discussion and debate that occurred on these topics. Through the force of his writings, he became one of the most influential figures in resolving doctrinal discrepancies for East Asian Buddhism. Although many of Wonhyo's writings are lost, through his extant work we are able to get a solid glimpse of his profound and learned insights on the nature and function of the human mind. We can also clearly see his hermeneutical approaches and methods of argumentation, which are derived from apophatic Madhyamika analysis, the newly introduced Buddhist logic, as well as various indigenous East Asian approaches. This volume includes four of Wonhyo's works that are especially revelatory of his treatment of the complex flow of ideas in his generation: System of the Two Hindrances (Yijang ui), Treatise on the Ten Ways of Resolving Controversies (Simmun hwajaeng non), Commentary on the Discrimination between the Middle and the Extremes (Chungbyon punbyollon so), and the Critical Discussion on Inference (P'an piryang non).

⇒ Dieser Titel ist/war im Internet online verfügbar.

⇒ Inhaltliche Zusammenfassung:

China Off Center takes as its fundamental assumption that contemporary China can only be understood as a complex, decentralized place, where the view from above (Beijing) and from tourist buses is a skewed one. Instead of generalizing about China, it demonstrates that this diverse national terrain is better conceived as it is experienced by Chinese, as a set of many Chinas. To that end, this anthology of interpretive essays and ethnographic reports focuses on the everyday, the particular, the local, and the puzzling. Together with contextualizing introductions, the readings provide students with a compelling look at some little-known but significant aspects of China from the past decade; for those already familiar with China, they furnish an assortment of uncommon viewpoints in a single, convenient volume. Foreword by Prasenjit Duara

- ⇒ Dieser Titel ist/war im Internet online verfügbar.

⇒ Inhaltliche Zusammenfassung:

The structure of the central part of the Soviet Arctic is a result of prolonged tectonic development which took place in seven main stages (tectonic periods). The structures formed comprised structural stages during each period respectively. The time limits of each stage were not entirely penecontemporaneous in adjacent regions. Thus, the main features of the tectonic development of the central Soviet Arctic are recurrent changes of the tectonic pattern and erosion processes at the end of each tectonic period and of each phase of its development. At the meeting of the First International Symposium on Arctic Geology held in Calgary, Alberta, Canada, January 11th to 13th, 1960, a number of instructive, interesting, and original papers on this topic were presented, and essentially all of them are printed in the pages of The Geology of the Arctic volumes I and II..

⇒ Inhaltliche Zusammenfassung:

Winner of the 2017 Sylvia Rivera Award in Transgender Studies from the Center for LGBTQ Studies (CLAGS) From Caitlyn Jenner to Laverne Cox, transgender people have rapidly gained public visibility, contesting many basic assumptions about what gender and embodiment mean. The vibrant discipline of Trans Studies explores such challenges in depth, building on the insights of queer and feminist theory to raise provocative questions about the relationships among gender, sexuality, and accepted social norms. Trans Studies is an interdisciplinary essay collection, bringing together leading experts in this burgeoning field and offering insights about how transgender activism and scholarship might transform scholarship and public policy. Taking an intersectional approach, this theoretically sophisticated book deeply grounded in real-world concerns bridges the gaps between activism and academia by offering examples of cutting-edge activism, research, and pedagogy.

The fundamental premise of this study is that the Buddhist sangha and Buddhist teachings play a key symbolic role in legitimating the exercise of secular power in Thailand. The author argues that a clear appreciation of the political legitimacy function of Buddhism provides the key to understanding the major theoretical and administrative changes that have taken place within Thai Buddhism in this century.

⇒ Inhaltliche Zusammenfassung:

Encompassing Amazonian rainforests, Andean peaks, coastal lowlands, and the Galápagos Islands, Ecuador's geography is notably diverse. So too are its history, culture, and politics, all of which are examined from many perspectives in The Ecuador Reader. Spanning the years before the arrival of the Spanish in the early 1500s to the present, this rich anthology addresses colonialism, independence, the nation's integration into the world economy, and its tumultuous twentieth century. Interspersed among forty-eight written selections are more than three dozen images. The voices and creations of Ecuadorian politicians, writers, artists, scholars, activists, and journalists fill the Reader, from José María Velasco Ibarra, the nation's ultimate populist and five-time president, to Pancho Jaime, a political satirist; from Julio Jaramillo, a popular twentieth-century singer, to anonymous indigenous women artists who produced ceramics in the 1500s; and from the poems of Afro-Ecuadorians, to the fiction of the vanguardist Pablo Palacio, to a recipe for traditional Quiteño-style shrimp. The Reader includes an interview with Nina Pacari, the first indigenous woman elected to Ecuador's national assembly, and a reflection on how to balance tourism with the protection of the Galápagos Islands' magnificent ecosystem. Complementing selections by Ecuadorians, many never published in English, are samples of some of the best writing on Ecuador by outsiders, including an account of how an indigenous group with non-Inca origins came to see themselves as definitively Incan, an exploration of the fascination with the Andes from the 1700s to the present, chronicles of the less-than-exemplary behavior of U.S. corporations in Ecuador, an examination of Ecuadorians' overseas migration, and a look at the controversy surrounding the selection of the first black Miss Ecuador.
